Synthetic Science Foundation

Award notice for SYN-2025-0117

Dear Dr. Ellery: The Synthetic Science Foundation is pleased to inform you that award SYN-2025-0117 has been made in the amount of $120,000 for the period September 1, 2025 through August 31, 2027. This award is subject to the terms and conditions incorporated by reference in this letter.

Participant support costs of $20,000 may not be rebudgeted into other categories without the prior written approval of the cognizant program officer. Requests must be sent to grants-office@ssf.example at least thirty days before the change.

The project studies how soil microbes respond to seasonal drought across three field sites. Work in the second year focused on sample collection, sequencing and the first round of analysis, and the team stayed within the approved budget for each category. The project studies how soil microbes respond to seasonal drought across three field sites. Work in the second year focused on sample collection, sequencing and the first round of analysis, and the team stayed within the approved budget for each category.

Equipment purchased under this award with a unit cost of $5,000 or more must be recorded in the university's property system within sixty days of receipt, and the record must name the award number and the location of the item. Items bought in the last ninety days of the award period need a written justification that explains why the purchase was necessary to complete the project. The justification is kept with the purchase record and is reviewed at closeout together with the property record, the invoice and the proof of payment. Where an item is shared with another project, the record must also show how its cost was divided between the projects and the basis used for the division, such as hours of use or the number of samples

processed for each project during the award period. Fabricated equipment is recorded when it is placed in service, at the total cost of its components, labor and any services bought to build it, and its record must list the invoices for those components so that each one can be traced to a charge.

Questions about this letter may be directed to Morgan Tate, Grants Officer, at mtate@ssf.example.
